

Commercial Premises Reliable Theft Protection

Location Auckland, New Zealand
Brief Stop theft from a retail store
Solution 3 automatic bollards

BACKGROUND

Since moving to new premises theft had become a common disruption for owners of an Auckland computer store. Their building has access down the side, so burglars could park a truck there and steal at will; undisturbed & undiscovered. It was becoming expensive & tiresome dealing with the issue - the owners needed a reliable and proven solution to solve the problem.

SOLUTION

Three automatic Bully Boy bollards have now been installed on the boundary of the property.

The bollards keep unauthorized vehicles off the property and on the public road. They are operated by remote control providing a simple and effective solution.

RESULTS

There have been no robberies or break-ins since installation, a real win for the store!
