

High Security After-hours Access Control Pumpkin Patch Clothing Head Office

Location	Auckland, New Zealand
Brief	After-hours access control and security
Solution	8 static security bollards 4 automatic bollards

BACKGROUND

Pumpkin Patch is a New Zealand design driven kids wear business. The company employs over 3,000 people and has more than 200 stores in four countries along with wholesale operations all over the world. Pumpkin Patch's business growth led to an extension of the Auckland head office in 2008.

CUSTOMER ISSUES

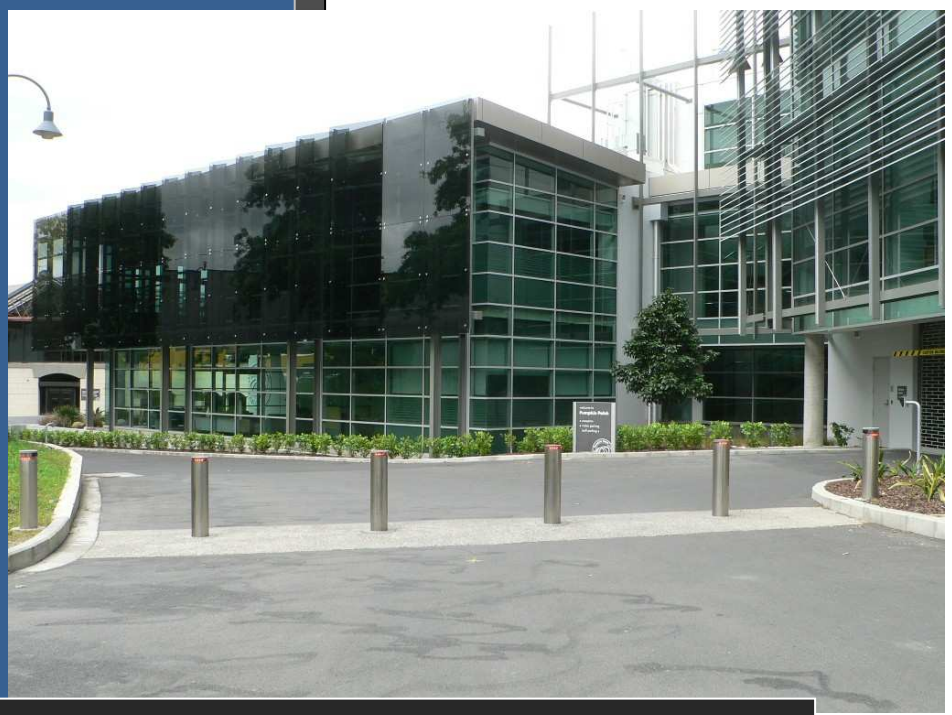

Pumpkin Patch required a high level of security for their property, including controlled vehicle access after hours. Bully Boy won the contract with Pumpkin Patch due to the elegance of the design, both in terms of engineering and aesthetics. In addition, the ability to integrate into Pumpkin Patch's established access control system.

SOLUTION

Bully Boy recommended 12 6 inch diameter 750mm high security bollards to provide a comprehensive installation across the Pumpkin Patch entrance. The Bully Boy team installed 8 fixed bollards and 4 automatic bollards in a single day. The Bully Boys are interfaced to Pumpkin Patch's in-house access control system allowing every staff member access with a proximity card.
